

Nooshin Behroyan is an award-winning energy executive, serial entrepreneur, and founder of Paxon Energy & Infrastructure—recognized as the 9th fastest-growing private company in America and the No.1 female-led company on the Inc. 500 list and covered by Forbes and Fortune magazine. A visionary leader in decarbonization and energy resilience, Nooshin pioneered methane recapture services in 2016, well before net-zero metrics became industry norms. Under her leadership, Paxon has become a nationally trusted partner for utilities, delivering critical services in wildfire mitigation, pipeline integrity, and electric grid modernization.

Known for building triple bottom line companies, Nooshin brings deep expertise in ESG strategy, infrastructure, and crisis response. Her boardroom acumen is reinforced by her own distinguished board, which includes a former U.S. Ambassador, former Chief Governance Officer of Chevron, and former CEO of the Department of Defense.

A UC Berkeley-trained architect, and an environmental engineer from UC Davis, she also serves on multiple nonprofit and advisory boards advancing women in STEM and energy leadership.
