Talent & Culture

While at Booz Allen during its journey from privately held, to PE backed, to publicly traded, she held P&L responsibility for the Transportation, DHS and Law Enforcement market. In addition, she founded, built and held P&L responsibility for one of the first large-scale data science teams and AI platforms in the world. Angela's background also includes founding, building and guiding a technology startup to a successful exit. In her current role at AlixPartners, she has P&L responsibility for the Global AI market, where she advises companies on building technology platforms at scale, scaling engineering organizations, and navigating the governance and operational demands of preparing for public markets.

Angela led advanced AI breakthroughs in quantum machine learning, deep learning, computer vision at scale, GPS, generative AI, cybersecurity and other areas. She is author of the bestselling book, *"The Mathematical Corporation: Where Machine Intelligence + Human Ingenuity Achieve the Impossible,"* a CEO Reads Best Business Book Award recommendation. She is a regular AI contributor for NBC News and the TODAY Show, and has been featured in the NYT, WSJ and many other publications. She authored the pioneering academic paper, "Building an Artificial Intelligence Explanation Capability."

Angela holds an MBA from Southern Methodist University and a Bachelor of Science in Industrial and Systems Engineering from Virginia Tech. She is NACD Directorship Certified.
